Message from the Chairman

Respected Clients,

At Windmason Arabia, innovation, sustainability, and quality define everything we do. As specialists in HVAC manufacturing, alongside flagship IDEC systems, we are proud to be recognized as a trusted brand in the industry, built on integrity, expertise, and strong partnerships. To our valued clients and partners, thank you. Your continued trust has been the foundation of our success. For those yet to work with us, we look forward to earning your confidence through our reliable products, expert solutions, and commitment to timely project delivery.

We remain dedicated to supporting Saudi Vision 2030 by driving economic growth, creating opportunities, and promoting fairness for all. With a focus on excellence and client satisfaction, we're shaping a smarter, greener, and more efficient future together.

Abdulaziz Al-Hammad.

DUCTWORK

ABOUT US

Welcome to **Windmason** Arabia.

In 2013, visionary Founders Eng. Wali Khan and Shakeel Ahmed Kayani launched Windmason Arabia with a clear mission: to revolutionize the HVAC landscape in Saudi Arabia by delivering sustainable, high-efficiency cooling solutions and advancing national localization goals through the production of premium Saudi-made alternatives to imported systems.

From the very beginning, the founders carried an extended vision that stretched far beyond commercial success. Their goal was to create an engineering legacy rooted in sustainability, innovation, and national self-reliance. As pioneers in the field, they led Windmason to become the first local manufacturer of Indirect-Direct Evaporative Cooling (IDEC) systems in the Kingdom, a game-changer in energy-efficient air conditioning.

Today, Windmason manufactures over 20+ HVAC products, all engineered in Saudi Arabia and built to compete on global standards. Our systems are designed not only to cool spaces, but to refresh lives—bringing green air conditioning that delivers fresh, filtered air while significantly reducing energy consumption and carbon emissions. At Windmason, we believe air is more than temperature, it's about purity, health, and impact. That's why we go beyond traditional cooling. Our solutions are eco-friendly, gas-free, and tailored to enhance indoor air quality across industrial, commercial, and community spaces.

We don't just cool buildings – We reshape the climate for future generations.
Because the air you breathe, should be as ambitious as the vision that built this nation.

Our Vision

To lead the HVAC industry with revolutionary, innovative, AI integrated HVAC solutions that outperform traditional Cooling systems delivering sustainable comfort, high operational efficiency, and long-term value for a greener future through saving energy and reducing carbon footprints to have improved IAQ as per vision 2030.

Our Mission

At Windmason, our mission is simple: to deliver exactly what you need not what we want to sell. We design smart, energy-efficient HVAC solutions that solve real problems, fit your budget, and perform reliably for years to come.

We don't oversize systems. We don't upsell. We listen, ask the right questions, and build solutions that work - nothing more, nothing less.

Driven by innovation, sustainability, and customer trust, we are committed to:

- Advancing cutting-edge, eco-friendly cooling technologies
- Supporting local production to strengthen industry resilience
- Providing reliable service and long-term operational value
- Expanding from the Gulf to global markets with purpose
- Empowering employees and uplifting the communities we serve

And when things go wrong - we show up. No excuses. Just real solutions from people who care about getting it right.

Our Core Values

Windmason Arabia - What We Stand For

CORE OBJECTIVES

We Build With You, Not Just For You

Partnership starts on day one with open ears, honest feedback, and shared goals. Every design, every decision, every duct run has your voice in it.

No Copy-Paste Cooling

Every building breathes differently. That's why we engineer each system from the ground up, custom-fit, cost-aware, and challenge-ready. One-size-fits-all? Not in our dictionary.

Solutions that Fit, Not Force

We don't force systems into spaces—they're made to fit seamlessly. We listen first, then engineer—ensuring our technologies serve your space, not the other way around.

Truth over Tactics

If it can be repaired, we tell you. If it needs replacing, we explain why. We don't pitch, we advise. That's how trust is built.

Quality Is Our Signature

From tools to testing, from insulation to installation, we treat every job like it's a benchmark, not a check box.

We Don't Vanish After Installation

Something off? We're already on it. You don't just get a service; you get a team that shows up, follows through, and never points fingers.

OUR GOALS - What drives us

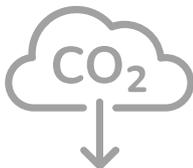

Energy Saving

Windmason IDEC evaporative cooling solutions are designed to optimize energy consumption, reducing electricity bills by up to 85%. In dry weather, we make sure that you're getting the most out of every watt of energy, reducing the environmental impact typically associated with air treatment and air ventilation.

Eco-Friendly

Windmason's R&D team is producing eco-friendly IDEC solutions because we rely on evaporative cooling solutions avoid harmful chemicals or gases. IDEC improves indoor air quality (IAQ) through fresh air circulation promoting both comfort and sustainability.

Carbon Footprints

By using significantly less energy and relying on eco-friendly, gas-free cooling methods, IDEC (Indirect-Direct Evaporative Cooling) systems can reduce carbon footprints by up to 85%—making them one of the most sustainable HVAC solutions available today. These systems not only minimize electricity consumption but also eliminate harmful refrigerant emissions, contributing to cleaner air, lower urban heat, and improved indoor and outdoor environments.

Fresh Air

IDEC systems deliver 100% fresh air circulation, significantly improving indoor air quality (IAQ) by flushing out pollutants—unlike conventional ACs that recycle stale indoor air. Whether it's your home, office, industrial facility, or outdoor space, Windmason Arabia offers a smarter, more sustainable HVAC solution that prioritizes both comfort and clean air.

OUR GOALS - What drives us

Optimal Hygiene

Maintaining a high level of hygiene is essential for health, Windmason uses cutting-edge technologies for filtration and purification systems to eliminate airborne contaminants and prevent pathogen spread, ensuring a clean, healthy, and safe indoor environment. Our HVAC installation services keep your environment free from pathogens and allergens.

Healthy Ventilation

Windmason's IDEC systems deliver 100% fresh air using indirect-direct evaporative cooling, ensuring high ventilation rates. With multi-stage filtration and low energy consumption, they effectively remove CO₂, VOCs, and particulates—enhancing IAQ and meeting international ventilation standards for industrial, commercial, and semi-open spaces.

Our capabilities reflect the experience and proven excellence behind every solution

WORKFORCE CAPACITY

- + **Certified** engineers, technicians, and field operators
- + **Integrated** cross-functional teams for seamless collaboration
- + **Flexible** workforce models for varying project demands
- + **Experienced** leadership with industry knowledge
- + **Ongoing** training in safety, compliance, and innovation

OUR SERVICES

01

Manufacturing

Windmason Arabia manufactures over 20 energy-efficient HVAC products designed for harsh Middle Eastern climates. Our range includes IDEC Supercool units, chillers, AHUs, and more. As a proud Saudi-based manufacturer, we continue to push the limits of HVAC innovation to support clean energy initiatives.

02

Consulting

Our Consulting division provides complete turnkey HVAC and MEP installation solutions for commercial, industrial, & residential developments. We help clients reduce energy use and meet environmental goals. From concept to compliance, our team delivers actionable insights that align with Vision 2030 & cost-saving targets.

OUR SERVICES

03

Contracting

We offer turnkey HVAC and MEP contracting solutions for industrial, commercial, and residential projects. From design to commissioning, we ensure seamless system execution. Our projects meet global standards and help clients create sustainable and smart infrastructures that last for decades.

04

Maintenance

To ensure peak performance and longevity of HVAC systems, Windmason Arabia offers professional maintenance services tailored to client needs. Our preventive and predictive maintenance programs are designed to minimize unexpected breakdowns, reduce downtime, and optimize energy usage.

OUR SERVICES

05

TAB Services

Windmason's TAB services ensure that your HVAC systems operate efficiently, consistently, and safely. Our certified technicians conduct thorough airflow balancing, hydronic testing, system diagnostics, & functional performance checks. We help clients eliminate inefficiencies by fine-tuning the system to meet design specifications.

06

MEP Services

We deliver integrated MEP services combining mechanical, electrical, and plumbing systems under one roof. We improve project coordination, reduce delays, that meet the highest standards of safety and sustainability. Our expert teams ensure compliance, safety, and operational excellence. Ideal for smart, sustainable building development.

HVAC Products

2-STAGE EVAPORATIVE IDEC COOLER SUPERCool

- Keeps the air supply temperature between 14°C to 16°C in dry weather conditions like in Madinah, Al-Kharj, Al-Qassim, and Riyadh.
- Achieves high evaporative efficiency, up to 120% wet bulb achievement.
- Ideal for cooling large areas like warehouses and factories.
- Can replace traditional package A/C units.
- Saves more than 80% of power compared to the same DX cooling system.
- Features thermostatic control and inverter variable speed function.
- AHU body with a sandwich panel, fibreglass internal layer, and a water tank.
- Equipped with a blow-through direct-drive backward centrifugal fan. Equipped with a washable dust filter and programmable auto drain.
- Dry running protection with indicator display.
- 100% fresh air cooling.

3-STAGE HYBRID EVAPORATIVE IDEC COOLER SUPERCool

- Optimized 2-stage IDEC unit with a 3rd cooling stage to tackle high humidity conditions.
- Offers a third stage of DX system or air-to-air heat exchanger as per client options.
- Achieves high evaporative efficiency, up to 130% wet bulb achievement.
- Maintains a supply air temperature of 17-18°C in semi-humid weather conditions.
- Features thermostatic inverter variable speed functions.
- AHU body with a sandwich panel, fibreglass internal layer, and a water tank.
- Equipped with a blow-through direct-drive backward centrifugal fan, washable dust filters, and programmable auto drain.
- Provides Dry run protection with an indicator display.

WATER SAVER – 2-STAGE EVAPORATIVE COOLER ECOLATER

- Specially designed to reduce water consumption by up to 50%. Achieves high evaporative efficiency, up to 100% wet bulb achievement. Offers lower humidity and better cooling compared to regular desert coolers.
- Features washable dust filters and thermostatic inverter variable speed functions.
- Dry running protection with indicator display.
- Ensures 100% fresh air cooling.

HVAC Products

INDUSTRIAL EVAPORATIVE COOLER

DESERT MASTER

- Doubles the life of cooling pads.
- Lower chance of cooling pads clogging, ensuring continuous cooling.
- Reduces salt formation.
- Features a fiberglass internal layer and a water tank.
- Includes dry running protection for the water pump.

2-STAGE EVAPORATIVE COOLER FOR HOUSES

SMARTCOOL

- Offers optimal evaporative cooling performance with wet bulb achievement up to 100%. Includes a heat recovery system for winter ventilation, saving energy.
- Equipped with a long-life, direct-drive fan without a belt, suitable for dry air.
- Features an air filter for prolonged cooling pad life.
- Variable speed and inverter smart controller for efficient operation.
- Ensures less water consumption and lower humidity.
- Smart thermostatic controller
- UV Light for disinfecting the air, Lower humidity

AHU, FAHU (AIR HANDLING UNITS)

CHILLED WATER

- Features a 50mm double skin body panel with an aluminum profile reinforced frame.
- Sturdy, heavy-gauge coated base frame.
- Equipped with vibration isolators for fan blowers.
- Customized, modular design to meet specific application requirements.
- Embedded control panel providing unit safety and user control with WiFi/BMS connectivity.
- Coated condensate drain pan.
- Includes pre-filters and fine filter sections as per design requirements.
- Can incorporate chilled water control valves and sensors as needed.
- Offers cooling, heating, and humidification sections.
- Options for microcontroller, PLC, HMI, and heat recovery sections.
- Choice between direct drive or belt drive.

HVAC Products

ECOLOGY UNITS (ELECTROSTATIC FILTERS)

ECOLOGY UNITS

- Designed for kitchen exhaust with electrostatic filters suitable for hospitals and restaurants.
- Available in standard and customized capacities.
- High-voltage solid particle arresting capability.
- Optional carbon filters for enhanced filtration.
- Offers both auto-clean and manual-clean options.
- Available with and without fan options.

MCC & AUTOMATION CONTROL PANELS

- Offers Variable Speed Drive (VFD) & MCC Panel.
- Designed for AHU, Pump set, and other HVAC system sequence & operation panels.
- Provides PLC and HMI programmable controller solutions.
- Competitive prices and an economical solution with a constant pressure pump set.
- Uses US-EU origin parts with local warranty and after-sales services.
- Includes BMS interface control panels and HVAC and Building Automation solutions.
- IoT (Internet of Things) controller solutions and Micro controller Solutions

CHILLED WATER

FCU (FAN COIL UNITS)

- Equipped with a direct-drive, long-life fan featuring a backward curve aluminum impeller.
- Comes with an intelligent controller, inverter, variable-speed temperature controller, and a smart touch screen thermostat.
- Offers WiFi and BMS connectivity interface for convenience.
- Features a low-noise easy access fan and a coated condensate drain pan.
- Includes 3-4 row heat-exchanger coils and embedded chilled water control valves.
- Auto chilled water balancing functions are part of its capabilities.
- All required valves are built-in, ready to connect to chilled water networks.
- Provides both hot and cool options with an electric PTC heater.
- Available in concealed ceiling type, cassette type, wall-mounted, and floor-mounted types.

HVAC Products

DX FRESH AIR UNITS

FAHU

- Suitable for areas requiring 100% fresh air.
- Features DX cooling with an air-cooled condenser.
- Includes a control panel for easy operation.
- Available in both split-type and package-type units.
- Capacities range from 5 RT to 100 RT, catering to airflow needs from 1500 to 30000 cfm.

HANGER COOLING SOLUTIONS

- Custom-designed cooling solutions for factories and warehouses, including both duct and ductless air conditioning units.
- Easy to move, install, and maintain.
- Doesn't require a heavy base frame.
- Features lightweight condenser and evaporator units

WATER CHILLER UNITS

- Water chiller units designed for both air conditioning and industrial processes.
- Available with scroll, screw, and semi-hermetic compressors.
- Equipped with microcontrollers and network connectivity. Available in both air-cooled and water-cooled types.

COLD ROOM EQUIPMENT

- Includes air-cooled and water-cooled condensers and evaporators.
- Available in standard and customized capacities.
- Offers various compressors suitable for different room temperatures. Comes with microcontrollers and network connectivity options.

HVAC Products

HEAT EXCHANGE COILS

- Includes water-to-water SS and aluminum heat exchangers.
- Features air-to-water fins and tube heat exchangers.
- Offers shell and tube heat exchangers, oil coolers, and compressed air cooling solutions.
- Includes air-to-air heat exchangers for heat recovery systems.

PORTABLE EVAPORATIVE AIR COOLERS

PORTABLE COOLER

- Features a powder-coated metal fan blade with a waterproof sealed motor.
- Portable and movable with wheels, providing an economical cooling solution.
- Ideal for workshops, factories, warehouses, and open areas, with low-cost maintenance. Competitively priced with capacities ranging from 0.5HP to 2HP, 3000 to 14000 cfm.
- Optional variable speed fan for added flexibility.

EXHAUST & SUPPLY FANS

- Roof-mounted, inline, tube axial, axial, and centrifugal type fans available.
- Features high static and heavy-gauge construction for durability.
- Long-lasting body ensures a reliable performance.
- Equipped with a backward curve heavy-gauge powder-coated centrifugal impeller.
- Supply fan includes pre-filters and bag filters with capacities ranging from 200 to 30,000 cfm.

HVAC Products

AIR HEATING ELEMENTS & DUCT HEATERS

- Offers Variable Speed Drive (VFD) & MCC Panel.
- Designed for AHU, Pump set, and other HVAC system sequence & operation panels.
- Provides PLC and HMI programmable controller solutions.
- Competitive prices and an economical solution with a constant pressure pump set. Uses US-EU origin parts with local warranty and after-sales services.
- Includes BMS interface control panels and HVAC and Building Automation solutions.
- IoT (Internet of Things) controller solutions and Micro controller Solutions

PACKAGED AIR CONDITIONING UNITS

- Comprises high-quality parts for reliable performance.
- Features a microcontroller touch screen thermostat.
- Offers both multi-stage and single-stage options.
- Includes network connectivity for enhanced control.
- Provides power-saving and data logger options.
- Allows remote WiFi control for convenience.
- Available in both inverter and non-inverter solutions.
- Capable of both cooling and heating.
- Comes in standard and customized capacities.

COOLING TOWER UNITS

- Offers both open loop and closed loop cooling towers.
- Sturdy construction with metal-reinforced body panels and a water tank featuring a fiberglass inner layer.
- Includes a backward centrifugal aluminum impeller direct drive fan.
- Features a dry running fan for prolonged use.
- Structures can be site-assembled or factory-assembled, with a modular design for larger capacities.
- Low maintenance for cooling media fills due to an external protective layer.
- Air filter added for clean water and air, ensuring internal parts stay clean.
- Dry air cooling units with a high-efficiency axial fan.

HVAC Products

DX PORTABLE AC UNITS

- High-performance air-cooled unit with cooling capacities of 6.25 TR, 12.5 TR, and 25 TR, using eco-friendly R410A refrigerant.
- Equipped with Copeland scroll compressors, efficient axial and centrifugal fans, and optimized Alu fins with Cu tubes for durability and efficiency.
- Compact design with low sound rating (70 dB), robust motor capacity, and suitable for extreme conditions up to 45°C ambient temperature.

WATER PUMP SETS

- Chilled water pump set for fireless, constant speed operation.
- Includes a supply water pump set with the required controllers.

VAV & CAV AIR VOLUME MOTORIZED DAMPER

- Provides constant and variable air volume solutions with smart controllers and network connectivity.
- Zone and room temperature controllers available for central air conditioning systems.
- Remote controllers for convenience.
- Features temperature display options.
- Wall-mount and wireless controllers for flexibility.

Eco – Edge AI

What is EcoEdge AI?

- EcoEdge AI is a compact, AI-powered device that intelligently automates HVAC systems using real-time data and predictive control.
- Unlike traditional systems, it anticipates future demands for optimal efficiency and comfort without manual input.
- Its Model Predictive Control (MPC) technology minimizes energy waste and equipment wear.
- Perfectly aligned with Saudi Vision 2030, EcoEdge AI drives sustainability through smarter energy use.

HVAC Optimisation

- Monitoring zone-level conditions
- Adjusting valve positions, fan speeds, and cooling loads
- Provides real-time system monitoring and data analytics
- Reduces HVAC energy consumption by up to 30% zone-level conditions
- Predicting future demands using AI-based Model Predictive Control (MPC)
- Detecting anomalies such as overcooling, stuck valves, or energy leakage
- Cuts carbon emissions and qualifies buildings for green certifications
- Preventing faults before they happen and ensure balanced thermal comfort without excessive energy use.

COMMUNITY ENGAGEMENTS

"Windmason – Powering Communities, Inspiring Change."

At Windmason Arabia, we believe that true progress comes from giving back to the community. We proudly stand with the individuals and organizations who dedicate their time, energy, and expertise to serving others across the Kingdom of Saudi Arabia.

Whether it's supporting local initiatives, empowering volunteers, or partnering with community-driven projects, Windmason remains committed to creating a positive impact that goes beyond business. Together, we are building a stronger, more connected, and sustainable future for all.

Windmason supported the VRF Conference by CPI Industry as Knowledge Strategic Partner

Windmason Arabia proudly supported the VRF Conference, organised by CPI Industry, as the Strategic Knowledge Partner. Our participation highlighted our commitment to advancing innovative and sustainable HVAC solutions, fostering industry collaboration, and contributing to the region's journey towards energy efficiency and environmental responsibility.

WINDMASON'S PARTICIPATION AT THE ANNUAL EVENT OF THE PAKISTAN BUSINESS FORUM AS KNOWLEDGE STRATEGIC PARTNER.

Windmason Arabia proudly participated as the Knowledge Partner at the Annual Pakistan Business Forum. This collaboration reflects our commitment to fostering business excellence, strengthening professional networks, and supporting knowledge exchange between industry leaders. Through our role, we contributed expertise in sustainable climate control solutions, aligning with Vision 2030 goals and promoting innovation across the region.

WINDMASON TEAM PARTICIPATION AT TEDx AS SULIMANIYAH

The Windmason team proudly participated in TEDx As Sulimaniyah, engaging with thought leaders, innovators, and change-makers to share ideas that inspire sustainable progress. Our presence reflected our commitment to driving meaningful conversations on innovation, community engagement, and environmental responsibility.

CPI Awards 2024

We're proud to share that **Windmason Arabia Co.** won two major awards at the Climate Control Saudi Awards 2024, with Chairman Abdulaziz Al-Hammad and Co-Founder Shakeel Ahmed Kayani recognized for excellence in two categories.

SAUDI ARABIA BASED MANUFACTURER OF THE YEAR – 2024

A prestigious accolade that highlights our commitment to innovation, quality, and sustainability in HVAC manufacturing. This national recognition affirms our leadership in producing world-class, energy-efficient cooling solutions locally, reinforcing our role in driving the Kingdom's industrial excellence and supporting the goals of Vision 2030.

MANUFACTURER/SUPPLIER OF THE YEAR (AIR MOVEMENT, VENTILATION)

A recognition to our excellence in delivering advanced, energy-efficient solutions for air distribution and indoor climate control. This award reflects our dedication to producing high-performance ventilation systems that enhance air quality, promote sustainability, and set new benchmarks in the HVAC industry across the region.

These prestigious recognitions have significantly elevated our spirits and strengthened our resolve to push boundaries further. They serve as a powerful motivation for Windmason Arabia to continue setting new milestones in the HVACR industry, not just as a manufacturer, but as a trendsetter in sustainable, high-impact cooling and ventilation solutions. With renewed energy, we remain committed to shaping the future of climate control across the region and beyond.

Windmason Workforce

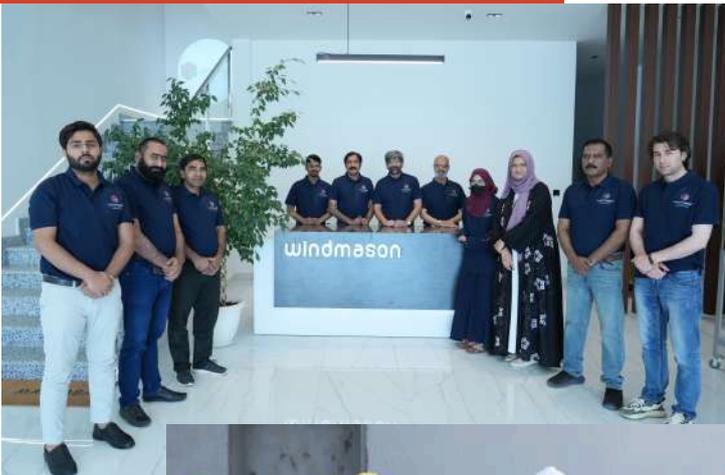

"Empowered by purpose, driven by dedication – Windmason's workforce is redefining the future of HVAC."
